GABRIEL

Web Developer

About Me

Systems thinker with deep expertise in Django, Celery, and scalable real-time architectures. I design maintainable workflows with clear state transitions, robust audit logging, and secure token lifecycle management. Known for bridging technical depth with practical delivery, I build systems that are transparent, resilient, and future-proof.

Skills:

|	
Django REST Framework	95%
SPA architecture (Js/React), Axios	70%
HTML, CSS, JavaScript, RESTful APIs	80%
Java/Kotlin, Android Studio, XML	80%
Docker, container orchestration	60%
Audit logging, tracing, logging config	60%
Token refresh, error handling, auth flows	90%

Education:

Senior High School Graduate (K–12)
Jaen, Nueva Ecija, Philippines
Completed: 2018

Language:

Filipino
100%

English

Professional Experience:

Backend Systems Architect

Freelance / Project-Based
Jaen, Nueva Ecija – 2021 to Present

- Architected a real-time support chat system with clear state transitions (pending → claimed → in-progress → archived), improving agent workflow clarity and reducing response time by 30%.
- Refactored SPA layout to separate thread list and conversation detail views, enhancing maintainability and reducing UI-related bugs by 40%.

Frontend Developer / SPA Architect

Freelance / Project-Based
Jaen, Nueva Ecija – 2021 to Present

- Collaborated with backend workflows to ensure real-time updates were reflected accurately and intuitively in the UI.
- Designed modular components for admin dashboards, enabling scalable feature development and clearer separation of concerns.
- Built domain-driven endpoint management, keeping frontend logic lean and improving long-term maintainability across modules.
